IMPORTANT SAFETY INFORMATION: READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

**WARNING - Seizures**
- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, such as while watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.
- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:
  - Convulsions
  - Eye or muscle twitching
  - Involuntary movements
  - Disorientation

To reduce the likelihood of a seizure when playing video games:
1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

**WARNING - Repetitive Motion Injuries and Eyestrain**
Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:
- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists, arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists, arms or eyes during or after play, stop playing and see a doctor.

**WARNING - Electric Shock**
To avoid electric shock when you use this system:
- Do not use the Nintendo GameCube during a lightning storm. There may be a risk of electric shock from lightning.
- Use only the AC adapter that comes with your system.
- Do not use the AC adapter if it has damaged, split or broken cords or wires.
- Make sure that the AC adapter cord is fully inserted into the wall outlet or extension cord.
- Always carefully disconnect all plugs by pulling on the plug and not on the cord. Make sure the Nintendo GameCube power switch is turned OFF before removing the AC adapter cord from an outlet.

**CAUTION - Motion Sickness**
Playing video games can cause motion sickness. If you or your child feel dizzy or nauseous when playing video games with this system, stop playing and rest. Do not drive or engage in other demanding activity until you feel better.

**CAUTION - Laser Device**
The Nintendo GameCube is a Class I laser product. Do not attempt to disassemble the Nintendo GameCube. Refer servicing to qualified personnel only.
Caution - Use of controls or adjustments or procedures other than those specified herein may result in hazardous radiation exposure.

**CONTROLLER NEUTRAL POSITION RESET**
If the L or R Buttons are pressed or the Control Stick or C Stick are moved out of neutral position when the power is turned ON, those positions will be set as the neutral position, causing incorrect game control during game play.
To reset the controller, release all buttons and sticks to allow them to return to the correct neutral position, then hold down the X, Y and START/PAUSE Buttons simultaneously for 3 seconds.
THE HISTORY OF STAR FOX

Andross’s Ambition (Star Fox® 64)
Corneria, the fourth planet of the peaceful Lylat system, is threatened by the forces of the mad scientist Andross. In response to this crisis, the Cornerian commander-in-chief, General Pepper, entrusts the fate of the planet to Fox, Falco, Slippy, and Peppy, who together form the Star Fox team.

After many vicious battles, the mercenaries reach the enemy stronghold on the planet Venom, where Fox challenges Andross to single combat. After a pitched battle, Fox narrowly defeats Andross and the threat is vanquished.

The Plight of Sauria (Star Fox Adventures)
A few years after the Andross affair, Fox is hired to investigate the planet Sauria. After adventuring across the surface, he reveals Andross as the culprit behind the troubles. The team is forced into a ferocious battle, but when it seems all is lost, Falco rejoins the team in the nick of time and Star Fox once again defeats Andross.

With the reinstatement of Falco and the addition of the mysterious young woman, Krystal, a new Star Fox team is born.

A New Journey (Star Fox: Assault)
One year has passed...

After getting kicked out of Star Wolf’s band of thugs, Andrew Oikonny takes control of his dead uncle Andross’s remaining army and starts a rebellion. The Cornerian fleet is sent out to deal with the rebels and hostilities commence. However, Oikonny’s army uses unexpected guerilla tactics and the battle takes a turn for the worse.

The exasperated General Pepper asks his old friend Peppy to help stop Oikonny and the Star Fox team takes off on a new mission!

Single-mode data will be saved after the results screen (pg. 21) is displayed. Changes made in the Options menu and Vs. mode results will be saved automatically.

GAME SCREENS

There are two types of stages: shooting stages and all-range stages. The screen displays differ slightly between the two.

SHOOTING STAGES

Stages where you pilot Arwings through 3-D environments are shooting stages. Proceed to the goals of the stages to clear them.

- **Number of Hits**
  - The direction you're attacking.

- **Arwing**

- **Number of Bombs**

- **Shield**
  - Your ship's endurance. If this reaches zero, you lose a ship.

- **Boost Gauge**
  - This goes down each time you brake, boost, loop, or do a U-turn. The gauge fills up little by little as time passes.

- **Communication Window**
  - This shows message text and the face of the character contacting you. In some cases it will also show the character's vehicle endurance or physical health.

- **Remaining Ships**
  - The number of ships you have left. If this reaches zero, your game is over.

ALL-RANGE STAGES

Stages where you control Fox and move around a contained area are all-range stages. You clear these stages by destroying a set number of targets. You can also pilot Arwings and drive Landmasters (pg. 33) on some all-range stages. When you change weapons in Pilot mode, the name of the new weapon is displayed.

- **Might Gauge**
  - On select stages, this gauge shows you increases and decreases in enemy numbers.

- **Combo Number pg. 17**
  - The current combo number appears here.

- **Targeting Cursor**
  - The shape of the targeting cursor changes depending on your current weapon.

- **Number of Barriers**

- **Shield**
  - The endurance of the vehicle you're using. If this reaches zero, the vehicle will be destroyed and only Fox will be displayed.

- **Life Gauge**
  - This shows Fox's health. If this reaches zero you will lose one life.

- **Radar**
  - This shows the location of Fox, enemies, vehicles, etc. Press Left and Right on to switch maps.

  - **Fox**
  - **Allies**
  - **Airborne**
  - **Surface**
  - **Targets**
  - **Arwings**
  - **Landmasters**

Ally icons will be colored differently for each character.
**SINGLE MODE**

These are the rules used in Single mode. Whether the missions are shooting stages or all-range stages is predetermined.

**BASIC RULES**

Take control of Fox and complete missions to clear individual stages and proceed through the game. If you're hit by enemy attacks or run into obstacles, you will take damage. If your life gauge or shield drops to zero, you will lose a life or ship and begin the mission again.

**GAME OVER**

If you have no remaining lives or ships and your life gauge or shield drops to zero, the game will end and the Title screen will display.

**SWITCHING VEHICLES**

On all-range stages, you can use both Arwings and Landmasters. You can change vehicles at any time. See page 30 to learn how to change vehicles.

**GROUP BONUS AND BLAST BONUS**

On shooting stages, you can receive group bonuses for taking out entire squadrons of enemy ships. You can also get blast bonuses if you destroy five or more enemies with a single attack. When you get bonuses you receive more hit points than normal. Blast bonuses are relative to the number of enemies you destroy, so the higher the number, the bigger the bonus.

**COMBO BONUS**

On all-range stages, a red gauge will appear when you defeat an enemy; if you topple another enemy while the gauge is still displayed you'll receive a combo. For every 10 enemies in a combo, you'll add a bonus to your hit score.

**PAUSE MENU**

Press START/PAUSE during missions to display the Pause menu. To continue from the Pause menu, select Continue with 0 or 2, then confirm by pressing A. To quit, select Quit and confirm the same way. The Pause menu also displays the amount of time you've spent on the current mission and any special flags (pg. 32) you've acquired.

**PROGRESSIVE MODE**

This game can be set to display a higher resolution image on TVs that support progressive mode (such as EDTV, HDTV). In order to use the progressive mode, you need a TV that can accept this type of input (see your TV operation manual), and a Nintendo GameCube Component Video Cable (available only through Nintendo, visit www.nintendo.com or call 1-800-255-3700). To activate the progressive mode, press and hold the B Button while the Nintendo GameCube logo is being displayed until the message "Do you want to display the game in progressive mode?" appears. Select YES to activate the mode. Please note that on some TVs, activating the progressive mode will set the format of the image to a wide screen (16:9) format.

- You cannot play the bonus game, Xevious, in progressive mode.
Here are the different moves you can perform in Star Fox: Assault. The controls shown here are for the Single Stick configuration.

**ROLLING**
Press `L` and tilt the `R` Left or Right when in a Landmaster or Arwing to roll. Enemy attacks bounce off when you’re rolling, so this is a good technique to use when multiple enemy attacks are closing in.

**LOOPS & U-TURNS**
When piloting an Arwing, tilt Up on `R` to perform a loop and Down to do a U-turn. Both of these maneuvers are useful when you’ve got enemies or missiles closing in from behind. One note of caution: U-turns can only be used on all-range stages.

**SWITCHING VEHICLES**
Press `Z` to enter vehicles on all-range stages. Press `Z` again to get out of vehicles. There are some space-only stages that you cannot do this on.

**SLIDE**
Press and hold `L` while moving with `R` to slide to the side without changing your direction. This is a helpful move to use when you want to counterattack and avoid enemy fire at the same time.

**CHARGE SHOTS**
While in vehicles, you use charge shots by pressing `A` to begin charging and pressing once more to shoot. While in Pilot mode, press and hold `A` to charge and release to shoot. While in a vehicle, you can lock onto an enemy while charging. The only weapons that can charge are the blaster and grenade. pg. 34

**CURSOR AIM**
Press and hold `R` and use `L` to move only the cursor. This is very useful when trying to shoot down airborne enemies.

**WING RIDING**
On specific stages you can ride on allied Arwing wings and attack. Use `L` to move the cursor and press `A` to fire. If you press and hold `A`, you can fire repeatedly. Use `R` to switch weapons.
Here are some hints that may help you progress through the game. Cooperate with the entire Star Fox team and shoot for high scores.

**Collect Special Flags**

There are five special flags per stage. Defeat specific enemies or blast suspicious areas to reveal them.

**Help Your Allies**

Your teammates will ask for your help from time to time during missions. As they are vital to your own success, try and help them as soon as you can. When you receive an SOS, watch your ally's vehicle endurance and health gauge, which will display at the bottom of the screen. If you can finish a mission without any of your teammates being forced to retire, you'll win an ally medal.

**Vehicle Management**

It's really important to maximize all your forms of transportation on all-range modes. There are some places that Landmasters won't fit into, so you'll have to proceed on foot.

**Space Fighter Arwing**

The primary fighting vehicle of the Star Fox team. It has been refined and improved to have the strongest firepower in the Lylat system. It's equipped with a G-diffuser system that gives it high maneuverability.

**Anti-Aircraft Tank Landmaster**
